Golay Fils & Stahl CSR Report 2022

As the year comes to an end, we want to take the opportunity to review the impact of the last 12 months and remind our suppliers and partners of our commitment to the ethical business practices firmly embedded in Golay Fils & Stahl's history and company culture.

In increasing times of socio-economic and geopolitical difficulties, we are committed to promoting and maintaining responsible and ethical practices in our day-to-day business and within our supply chain. Over the last year we have fulfilled goals in multiple areas of our CSR strategy, notably our dedication to ensure the ongoing strength of our communities by donating volunteer hours, funds and supplies to local charities and auctions benefitting causes close to our hearts.

Also high on our priority list is responsible sourcing. The bulk of our inventory is vintage or "recycled" whether pertaining to stones or jewellery. When buying newly manufactured stones, we would like to reiterate that we do not source directly from any conflict areas, including Russia.

As we require transparency from our partners and suppliers, we urge them to revisit their own policies on a regular basis and do their utmost to implement transparent sourcing policies and due diligence standards in their supply chains.

To our partners and suppliers, Thank you. We are grateful for your efforts in adhering to our business practices and helping us improve our relationships for a more transparent gem trade.

Warm Regards,
Golay Fils & Stahl S.A.
